Peterbilt Air Leaf Pinion Angle Shim

Q1: What applications do these shims fit?

A1: These shims are an upgraded version of Peterbilt Part #'s 03-07771-002, 03-07771-003, and 03-07771-004. They will fit and adjust pinion angle on the drive axles of Peterbilt tractors that have the 'Z-spring' rear air suspension, - i.e. where the main leaf spring is bent in a 'Z' shape to support an air bag behind the axle.

Q2: What makes these shims better than the OE shims?

A2: SPC replacement shims are made with zinc rather than the aluminum the OE provides. This is a stronger shim that will withstand packout significantly better.

Q3: What if the truck I'm working on already has shims?

A3: Replace the OEM shim with the SPC shim of the proper degree to obtain correct driveline angle. SPC does NOT recommend stacking shims. (OE+SPC or SPC+SPC)
