

EZDoff Medical Gowns by

ProTEC-USA
Built with integrity.

American-made Solutions for your PPE Needs

ProTEC-USA has the unique ability to serve as a full-manufacturing resource for PPE **proudly produced entirely in the United States** by our highly qualified local workforce, using proprietary materials and processes. Our EZDoff medical gowns are 100% designed and manufactured in Michigan by Cadillac Products, Inc., ensuring control of the entire supply chain process. We offer Level 1, Level 2 and Level 3 disposable gowns.

We're able to **shorten your supply chain, deliver quality products on-time and in excellent condition**, avoiding problems commonly experienced when working with offshore PPE manufacturers.

EZDoff Medical Gowns by

ProTEC-USA
Built with integrity.

Features and Benefits

ProTEC-USA offers a variety of medical-grade gowns to meet the needs of professionals from a range of industries. All of our gowns are designed to maintain the integrity of comfort, flexibility and safety for all end users' needs, while also conforming with Level 1, 2 and 3 requirements.

Our procurement and manufacturing teams allow us to manage the sourcing of materials and manufacturing processes in-house, ensuring customers receive medical gowns that consistently meet or exceed industry standards for maximum performance and value.

Perforated rear yoke

Enables safe, easy doffing of isolation gowns.

Sleeve with thumb loop

Stays in place while donning and doffing gloves - provides improved coverage and protection vs. cuffed sleeve design.

Apron closure/ Open back design

Maintains the user's coolness during work performance.
